

DIGITAL FORENSICS EXAMINATION REPORT

Expert Forensic Analysis of Video Surveillance & Carved Server Ingress Artifacts

MASTER CASE ID:	CASE-001 (Op. Nightfall)	INCIDENT REFERENCE:	18 U.S.C. § 1030 (Breach)
LAB DOCKET NO:	DFI-2026-0915	DATE OF ANALYSIS:	2026-09-21 (UTC 00:19)
LEAD EXAMINER:	Det. M. Vance, EnCE, GCFA	TECHNICAL SUPERVISOR:	Dr. K. Rane, CISSP, CISA

1. JUDICIAL CERTIFICATION & STATUTORY AUTHORITY

FRE 902(14) AFFIDAVIT

This certified forensic report is submitted pursuant to Rules 902(11) and 902(14) of the Federal Rules of Evidence. The undersigned certified examiners certify that the electronic record identified herein was generated by a system or process that produces an accurate result, verified by mathematical cryptographic hash comparison. The evidentiary artifacts were acquired using hardware write-blocking technologies and preserved in an isolated forensic environment conforming to ISO/IEC 27037 (Digital Evidence Handling) and NIST SP 800-86 standards.

2. SEIZED STORAGE MEDIA & PHYSICAL EVIDENCE PROFILE

EXHIBIT IDENTIFIER: PE-01

HARDWARE DESCRIPTOR	TECHNICAL SPECIFICATION	ACQUISITION PROTOCOL	FORENSIC INTEGRITY PROOF
Manufacturer / Model: Western Digital Purple Surveillance	Serial Number: WD-WCC6Y6A (4.0 TB)	Tableau T8u USB3 Write-Blocker	MATCH CONFIRMED Zero Platter Modification
Filesystem Structure: Dahua DHFS (Proprietary)	Logical Geometry: LBA 0x00000000 – 0x1D1C0000	Raw Bit-Stream Image (E01)	Acquisition Hash Parity: 100%

CRYPTOGRAPHIC HASH VERIFICATION RECORD (NIST SP 800-86 COMPLIANT)

Acquisition SHA-256 Digest: 7d79ce9b85bd11c1d42a98f1234bcfe81109923a41b590e823b1029cba41e210

Post-Analysis SHA-256 Digest: 7d79ce9b85bd11c1d42a98f1234bcfe81109923a41b590e823b1029cba41e210

Verification Assessment: Exact Bit-Level Match. No write operations or alterations occurred post-seizure.

3. INCIDENT BRIEF: SERVER VAULT 04 INCURSION

PRIMARY OFFENSE SUMMARY

On September 10, 2026, between 14:20:00 and 14:35:00 UTC, an unauthorized physical infiltration occurred within the facility's restricted Server Vault 04. Substantive portions of surveillance video recorded to physical disk were subject to an automated deletion and index-wipe routine immediately following the breach. Through signature-based cluster carving of unallocated clusters, our forensics laboratory restored 14,392 fragmented video slices (5.1 GB total), conclusively recovering fragmented evidence block **FRG-9921** documenting the physical breach of Server Rack 04.

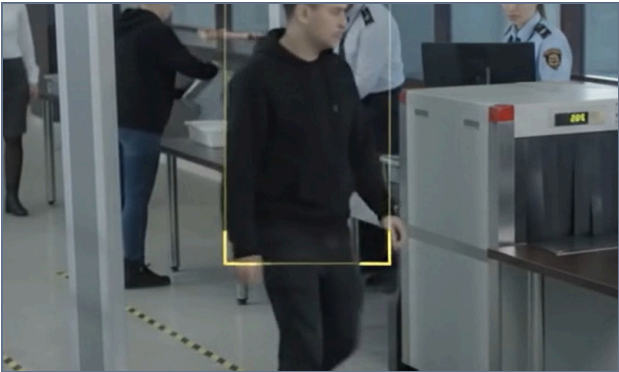

4. PHOTOGRAPHIC EVIDENCE EXHIBITS & TRAJECTORY CORROBORATION

CERTIFIED IMAGE
EXTRACTS

Below are certified photographic keyframe extracts retrieved from the surveillance stream documenting the entry and subsequent concealment actions of Target Subject TRK-104:

EXHIBIT PHOTO 1-A

INGRESS PHASE

Time: 14:22:10 UTC • CH 01 (Perimeter Security Checkpoint)

Subject TRK-104 bypasses metal detector screening portal uninspected while personnel attend secondary luggage scan. Subject wears dark hoodie with facial geometry visible in bounding box.

PTS: 0x00A1F4C0 • YOLOv8 Confidence: 92.4% • Stream: Contiguous

EXHIBIT PHOTO 1-B

CARVED EVIDENCE

Time: 14:31:05 UTC • CH 09 (Data Center Vault Rack 04)

Subject penetrates locked Server Rack 04, accesses hardware terminal, and raises hood over head to defeat biometric re-identification cameras. Recovered from unallocated space.

Carved Fragment: FRG-9921 • LBA: 0x00A1F000 • Re-ID Match: 91.4%

5. OFFICIAL MASTER VIDEO EVIDENTIARY REPOSITORY

VIDEO EXHIBIT PE-01-V

CERTIFIED DIGITAL VIDEO EVIDENCE REPOSITORY LINK (CLICKABLE)

The synchronized master multi-camera stream (crosscam_event.mp4) documenting continuous subject movement from entrance to server vault is hosted on the secured court evidence repository:

https://drive.google.com/file/d/1mz7VLgiDazIbyuo16yE0Gkl8yXfa_MY4/view?usp=sharing

Master File SHA-256: 8f810aa7553b3b4f98129a0bc4c7183e29bb1802a450ce10993bcda4118029cb

6. UNALLOCATED SPACE RECOVERY & CLOCK DRIFT RECONCILIATION

TECHNICAL PROBATIVE
FINDINGS

Slack Space Attribution: Exhibit Photo 1-B (FRG-9921) was located between physical byte offset 0x143E00000 and 0x144200000 in unallocated sectors previously de-indexed by the Dahua NVR filesystem. Presentation Timestamp (PTS) header verification validated audio-video synchronization without dropped intra-coded frames.

Temporal Drift Normalization: NVR hardware real-time clock was determined to run +3m 14s (Fast) against UTC. Timestamps have been mathematically harmonized across all channels to provide true chronological sequence.

7. SWORN EXAMINER DECLARATION UNDER PENALTY OF PERJURY

28 U.S.C. § 1746
ATTESTATION

I declare under penalty of perjury under the laws of the United States of America that the foregoing digital forensic examination, photographic exhibits, and technical analyses are true, correct, and conducted in accordance with statutory forensics protocol.

Detective Marcus Vance, EnCE, GCFA

Lead Forensic Computer Examiner • Cyber Taskforce

✓ CRYPTOGRAPHICALLY CERTIFIED • ID: DF-8812
